**Subject:** FW: Seven Hills Mine

The State Of Indiana's DNR comments on Seven Hills. They request denial. Their summary below.

4) Summary Comments:

Based on the extreme level of impacts, low proposed mitigation, and no practical information regarding listed species, the proposed project would result in significant environmental harm and unreasonably detrimental impacts upon natural resources. It is not clear how this project could move forward given these issues. The Environmental Unit recommends that the permit application be denied.
